CALL FOR STREAM LEADERS AND PROPOSALS

5TH INTERNATIONAL INTERDISCIPLINARY CONFERENCE ON TIME PERSPECTIVES

13th – 17th July, 2020, University of Applied Administrative Sciences NRW, Cologne, Germany

The Conference

Time and time perception is a central concept for a wide range of social and natural sciences. The perspectives on time are rather heterogeneous in different disciplines and need a broader framing. The International Time Perspectives Conference has provided an arena for within discipline and interdisciplinary discourse, interconnecting different streams and schools in the study of time since 2007. We welcome contributions from psychology and other social sciences, natural sciences, health sciences, and the humanities, including anthropology, philosophy, and political science, among others. We also aim to broaden the scope of our discussion by supporting interactions with other disciplines like, for example, the arts, urban studies, gender or literature studies, economics, design, and information technology, just to name a few.

Procedure

The conference is organized as a collection of streams with additional workshops and common key note lectures. The conveners of the streams can work rather autonomously, inviting researchers in their area to submit their work. Therefore, the convener teams should include at least one well established and experienced researcher. There will also be a general stream, where the authors can submit individual high quality papers directly to the conference convenors and a large poster session. All individual papers, posters and stream proposals will be a subject to a full peer review process.

The responsibilities of the stream conveners include the following:

- Conducting a call for papers for the particular stream;
- Distributing the call for paper using all available networks;
- Reviewing and evaluating the submissions: The amount of the submissions, which can be accepted for one stream is not limited, it must be a high quality work; The stream will get enough time slots to present all accepted papers and might therefore conduct one or several sessions during the conference;
- Communicating with the attendees, with other stream leaders and with the conference organizers prior to and during the conference;
- Forwarding some submissions to a more appropriate stream;
- Reviewing submissions from streams other than the one they are convening;
- Assigning chairs for sessions in the stream (stream conveners can serve as chairs).

Potential Topics of Interest

We are interested in interdisciplinary approaches to time research. Streams might include following areas: Our everyday experience, understanding and perception of time; temporal practices of individuals, groups, societies or cultures; time perceptions; mental time travel; inter-temporal choices and decision-making; temporal cultures and socialization; cross-cultural time research; neural correlates of time perception; near-death time experience; clinical implications of time perspective; procrastination; the history of time taking; biographical work and time perspective, time management; time in business, time lack, inequality of time, social status and time use, gendered time practices; evaluation of time use; work-life-balance and conflicts; subjective understandings of time; education and time, career success and time orientation; considerations of future consequences, hope; instruments and methods for measurement of temporal psychology constructs; power and time use; acceleration, pace of time, rhythms and time structure, flow; chronotypes; resonance experience; (re-)construction of the past; mindfulness and time, boredom and the length of time; biographical patterns; time in the construction of identity.

Although long, this list of topics is intended to be suggestive rather than exhaustive. Contributors may choose to draw on material from a wide range of empirical spheres and/or theoretical perspectives or artistic work.

Timeline

1st October 2018	Call for stream proposals opens
	Call for individual abstracts opens (abstract max. 500 words)
	Abstract submission for Early review opens
	Poster submission opens
1st March 2019	Early submission deadline for the submission of the stream proposals. Abstract max. 1.000 words; In addition to title, stream proposals should include a summary of the overall theme, the proposed call for papers, names and affiliation of the conveners, and proposed chairs of the sessions
1st April 2019	Early decision on acceptance of a stream proposal
1st July 2019	Deadline for abstract submissions for Early review
	2nd deadline for the submission of the stream proposals
1st August 2019	2nd decision on acceptance of a stream proposal
	Stream leaders communicate to the conference organizers the accepted papers (rolling acceptance)
	Stream leaders communicate to the authors the decision on acceptance of their papers (rolling acceptance)
1st January 2020	Closing of the early bird registration for the conference

1st Mai 2020	2nd deadline for the submission of the individual abstracts and posters
	Stream leaders communicate to the conference organizers the decision on acceptance (rolling acceptance)
	Stream leaders communicate to the authors the decision on acceptance (rolling acceptance)
1st July 2020	Deadline for the regular registration for the conference; It is possible to buy daily tickets until the end of the conference
13th July 2020	Onsite registration opens at the venue
	Opening ceremony
17th July 2020	Closing ceremony

Conference Organizers:

Elisabeth Schilling; Marc Wittmann; Alan Bec; Anna Sircova; Oksana Senyk; Tianna Loose; Alarith Uhde; Frank Worrell, Victor Ortuno, Alejandro Vasquez.
