

The Leibniz Institute for Research on Society and Space is pleased to announce a position as **junior researcher (65 %)** in the Volkswagen-funded research project „New regional formations: rapid environmental change and migration in coastal regions in Ghana and Indonesia“, in the subproject “Migrant trajectories” that is coordinated by the Research Unit 4 “Regeneration of cities” as soon as possible until June 30, 2017.

Fields of activity:

- Empirical research on the role of the Ghanaian and Indonesian diaspora in Europe --Contribution to the theoretical debate on migrant regimes, migrant trajectories and diaspora research with a focus on environmental issues
- support for presentations and papers in the context of international conferences
- cooperation for the elaboration of new research projects in this field of expertise

Prerequisites:

- Master degree in the field of migration studies, urban geography and/or social sciences
- Sound knowledge in the field of migration, resilience and regeneration
- Strong motivation to work in a cooperative and flexible team environment
- Experience with qualitative research and intercultural skills
- Fluency in German, English and a third language, preferably Ewe or Bahasi.

The position offers:

- A highly stimulating, high profile research group with an international focus
- Excellent institutional environment with manifold opportunities for international cooperation
- possibilities to develop a draft proposal for a PhD in the field
- Salary corresponding to TVL 13

Please send you application with the reference number **4916** until **November, 25th 2016** per E-Mail to bewerbungen@irs-net.de.

The IRS is explicitly admitted to the principle of equal opportunities. Women are especially encouraged to apply. Handicapped people will be preferentially considered in case of equivalent qualifications.

The IRS supports the reconciliation of work and family life and was certified as a family-oriented employer in 2015.
